## GENERAL NOTES.

The headings of the respective classes in this Schedule are used only for convenience of classification, and shall not in any way affect the interpretation of the Tariff.

"n.e.e." means "not elsewhere enumerated."

The term "in bulk" when it appears in the Tariff, means—

(a) goods loose without packing, or loose in barrels, casks or any other single outside package, but not including goods imported by parcel post;

(b) when in internal packages, that the net contents of any immediate container of goods weigh not less than ten pounds or measure not less than one imperial gallon.

Goods chargeable with duty by weight are, except where otherwise provided for, charged with duty on the net weight, which may be arrived at either by weighing net, or deducting from the gross weight the actual tare or an average tare agreed to by the importer.

Tins, jars, bottles and other receptacles of reputed weight or content to be deemed not less than such weight or content.

Twenty-four reputed half-pints, twelve reputed pints, six reputed quarts, or four reputed imperial quarts to be deemed to be not less than one gallon.

Cement in packages of not less than 350 lb. and not more than 400 lb. to be deemed 400 lb.

Oils and motor spirits in ordinary reputed two five-American-gallon or ten one-American-gallon tins to be deemed to be not less than 8½ imperial gallons, and two reputed four-gallon tins to be deemed to be not less than eight imperial gallons.

"Proof" shall mean the strength of proof as ascertained by Syke's hydrometer.

"Proof spirits" shall mean spirits which, at a temperature of 51 degrees Fahrenheit, weigh 12/13ths of an equal volume of distilled water at the same temperature.

A complete article imported in an unassembled condition, except where specially provided for, is liable to the rate of duty which would be applicable to that article if imported in a fully set up condition, notwithstanding that the constituent parts are packed separately and are separately provided for elsewhere in the Tariff.

Integral parts of an article which is liable to an *ad valorem* duty, or is free of duty, imported for replacement purposes, or as spare parts, shall be liable to the same rate of duty as the article itself, or free of duty, as the case may be, unless they are specifically excluded, or provided for elsewhere, in the Tariff.

Refund of full duty is allowed on imported goods when exported, if applied for within twelve months from payment of duty, and if certain conditions have been carried out in terms of section 163 to 168 of the Customs Management Ordinance.

PARTICULARS OF TOWN PLANNING SCHEMES IN PROGRESS.

---

## 1. MOMBASA.

(i) **THE MOMBASA TOWN PLANNING SCHEME, 1926**, (enacted under the Town Planning Ordinance, 1919). Scheme applies to the Island of Mombasa with exception of the Old Town of Mombasa, and unplanned densely built over area of about 70 acres on the eastern shore of the Island at the Old Port of Mombasa. The scheme consists for the most part of pooling and re-distribution of holdings of land and re-adjustment of boundaries, for the purpose of facilitating the provision of adequate roads. The scheme is being carried into effect by the Mombasa Municipal Board as Responsible Authority, with the District Surveyor as Executive Officer.

Various details of the scheme are under consideration with a view to revision by means of amending schemes to be made under the Town Planning and Development Ordinance, 1931.

(ii) **MOMBASA OLD TOWN IMPROVEMENT SCHEME.** This scheme consists of the provision of two 25-foot traffic thoroughfare through the Old Town. Adjustment of plots and holdings to conform to the new street building alignments is proceeding gradually, as opportunity offers, without further expenditure.

(iii) **MOMBASA MAINLAND NORTH (Mkomani).** Preparation of a Town Planning Scheme, in accordance with the Town Planning and Development Ordinance, 1931, for the control of development on the Mainland is in hand. Some pooling and re-distribution of holdings of land, and considerable re-adjustment of property boundaries is inevitable.

## 2. NAIROBI.

(i) **COMMERCIAL AREA.** A scheme for this area was prepared in 1928. The area is about 700 acres, already largely developed. The scheme is being worked to as a non-statutory development plan subject to reconsideration as may be found desirable.

(ii) **DUKE STREET AREA.** This is an area of about 25 acres, the re-planning of which has become necessary owing to bad subdivision of properties and inadequate provision of streets. A scheme has been prepared and is under examination with a view to being given the force of law under the Town Planning and Development Ordinance, 1931.

## 3. KISUMU.

**OLD BAZAAR.** Area about 20 acres. Scheme prepared in 1928 provides for the re-planning and re-development of plots, suppression of obsolete sanitary lanes, and widening of main road. The scheme is to be carried into effect by means of voluntary surrender of existing titles in exchange for new titles with building conditions to conform to new plot boundaries and building alignments.

## 4. GENERAL.

Preparation of development plans and revisions of existing Township layouts is in hand for Nakuru, Eldoret, Kitale, Nyeri, Nanyuki and Thika. Control of development is effected in accordance with provisional development plans already made or in course of preparation.

(3)—WEIGHTS and MEASURES

The Standards of Weight and Measure legalised for use in trade are the Imperial Pound, Yard and Gallon as defined by the Imperial Weights and Measures Act, 1878. The authorised denominations of weights and measures are the same as those in use in Great Britain, but with the exception of the 100 lb. or cental weight and the addition of the 4½ gallon measure (5 American gallons approx.)

Metric weights and measures legalised for use in Great Britain by the Weights and Measures (Metric System) Act, 1897, may be legally used in the Colony.

The use of some of the older measures still prevails in the outlying districts, the principal being the pishi, equivalent to 0.65 gallon, the kibaba, equivalent to 26 fl. oz., the term korja is also in use for a score, used in measuring poles

The term frasila is still in use as a commercial term, but is always qualified by reference to the Imperial pound. The usual equivalent is either 35 lb. or 36 lb. and varies in different districts and with different commodities.

The paraffin or kerosene tin made to contain 4½ gallons is in common use among the natives for transactions in grain, potatoes and coffee.

The use of Imperial or Metric weights and measures is enforced in the principal trading centres and a regular system of annual re-verification and inspection is carried out.

## EXPLANATORY NOTES

1. The statistical year is reckoned from 1st January to 31st December, inclusive, and figures shown in these returns cover all imports and exports during that period.

2. The following are definitions of terms used in these tables :—

“ *Domestic Produce* ” means goods, the growth, produce or manufacture of Kenya and Uganda.

“ *Home Consumption* ” is a technical term in use, and does not imply that the goods have been actually consumed in Kenya or Uganda, but that they have passed into possession of the importer and that duty has been paid on that portion liable to duty.

“ *Value* ”.—The value of imports is given as the value “ex-ship” at the port of entry; such values exclude trade and cash discounts, but include freight, insurance and the value of the packages containing such goods, together with any commission paid.

For goods exported, the produce or manufacture of Kenya and Uganda “f. o. b.” Mombasa value is given while this value is also given for re-exports from open stocks. In the case of exports from bond, the value recorded is that at which the goods were originally warehoused.

“ *Country of Origin* ”.—Imports are credited, where possible, to the country in which the goods have been grown, manufactured or produced; in cases where particulars of origin are not available, the goods are credited to the country of despatch.

“ *Country of Destination* ”.—By “countries of destination” is meant the countries of destination so far as can be ascertained at the time of shipment. In cases where particulars of ultimate destination are not known, the goods are credited to the declared country to which they are consigned.

3. The summary tables referring to imports (Nos. 1, 5, 8 and 12) cover all goods entered for Home Consumption but do not include goods imported on Government account or goods entered for warehousing and remaining in bond; such goods being shown under their proper statistical headings in the detailed statement of imports (Table No. 9).

4. Goods entered for Home Consumption and subsequently re-exported are included in the import tables and are also shown in the tables of re-exports.

5. Separate particulars relating to imports and exports of goods declared in transit and transshipment are given. These are not included in the import and export tables.

6. Government stores, including material for Public Works, are recorded separately under their proper statistical headings and are shown in the detailed table of imports (No. 9).

7. Goods imported into bond are classified under their relative headings and included with the total imports in the detailed table of imports (No. 9) and goods exported from bond are recorded under their relative headings in the various re-export tables.

8. Goods imported as passengers' baggage are included in these tables as are also goods exported as ships' stores.

9. Fish caught in territorial waters are not included.

Sawmill licences	19	435,648	<p>No new licences were issued during the year. Of the total area under licence it is estimated that not more than 150,000 acres carry timber in workable quantities.</p> <p>Much of the remaining 641,594 acres of commercial timber is at present inaccessible, but it is possible that when a comprehensive timber survey can be undertaken the results will show that further areas can be opened for exploitation.</p> <p>Owing to the universal trade depression there was a heavy drop in the sales of practically every item of forest produce. Sawmills were severely hit and a number were practically closed down.</p> <p>Excellent reports were received from England on logs of East African Olive and Camphor sent home the previous year for trial. A large trial order was received for the Olive for block flooring. In case of Camphor further logs for more extensive trials are being sent.</p> <p>The Cedar pencil slat trade owing to the slump in Europe and elsewhere showed a serious decline but enquiries began to increase at the end of the year including several from new sources.</p> <p>A tender was accepted for the large bamboo paper pulp concession advertised during the year.</p>

**(7)—SUMMARY OF INDUSTRIAL DEVELOPMENT****AGRICULTURAL**

(1) **ACREAGE AND DEVELOPMENT.**—The total area under occupation by Europeans as at the 28th February, 1931, was 5,389,965 acres; of this area 659,380 acres were under cultivation, while it was estimated that 1,421,370 acres were developed under cattle, and 739,056 acres under sheep.

(2) **OCCUPATION.**—The number of occupiers as at 31st July, 1931, is given at 2,106 an increase of 9 or 0·43 per cent. The average area cultivated per occupier is 313 acres and the area developed under livestock 1,030 acres, equivalent to a total of 1,343 acres per occupier. On an average each occupier exported produce to the value of £1,359 during the year.

(3) **CROPS.**—The area under maize decreased during the year by 33,057 acres. The area under wheat increased by 5,634 acres. Coffee increased by 647 acres, and sisal decreased by 713 acres.

(4) **LIVESTOCK.**—The number of cattle in the possession of Europeans increased by 4·42 per cent during the year, the number of pigs decreased by 2,140 or 12·3% while woolled sheep decreased by 5·6 per cent. The export of wool is given at 8,335 cwt., a decrease of 8·7 per cent as compared with the preceding year.

**FORESTAL**

The general depression resulted in a very large drop in the amount of timber sold—the total value being the lowest since 1922. The sales of firewood, which have increased annually for many years, declined 20% compared with the previous year.

**TROUT**

During February 1928, 53 Black Bass were imported from England and introduced into Lake Naivasha.

These Black Bass have done very well and Lake Naivasha now offers excellent fishing.

A batch of Trout ova was carried out and 17,950 Fry were sold for Sh. 3,590.

II.—If not on the separate system, what provision is there for the supervision of the prisoners while in association?

III.—How many cells are there; and how many associated wards?

## ANSWER.

(1) None of the 30 prisons is on the separate system

And what superficial area?

V.—How are the prisoners classified?

VI.—Is penal labour—that is, labour by treadmill, crank or shot drill—in force?

VII.—If so, during what periods of imprisonment, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of treadwheel labour, give, first the total time on and off at the wheel, etc.; secondly the length of spells and intervals of rest.

VIII.—What kind of labour, other than penal labour, is in use?

IX.—If the prisoners are employed beyond the walls of the gaol, state:—

(1) On what kind of work they are so employed?

(2) How are they supervised?

(3) How many escapes of prisoners, while being employed beyond the gaol, have taken place during each of the last three years?

(4) How the profits of their labour are accounted for?

X.—What was the total annual cost of the prisons during the year 1931?

The total cubic capacity of the 30 prisons is about 710,000 cubic feet, which divided by a daily average number in prison of 2,503 during 1931 gives an average of about 280 cubic feet per prisoner.

In the permanent portion of Nairobi Prison, a prisoner in a cell has 895 cubic feet, and prisoners in wards have 300 cubic feet each, and 29 super feet of floor area.

(1) Criminals, and Civil Debtors, and Lunatics;
